

LESSON PLAN

CHAPTER 1 : KNOW YOUR COMPUTER

Introduction

First, discuss the different types of machines and their working and second, explain the difference between the machine and computer, with their working capacities.

Interactive Questions

1. What do you mean by a machine?
2. Name different types of machines with their works?
3. How a machine works?
4. How machines are helpful to us?
5. Differentiate between machine and computer.

Focus Points

1. Make the students aware about machines and their working.
2. Conduct a class quiz by telling them to answer the work of the machine which is asked by you.

How to End the Chapter

Realise the students about the importance of machines in our life.

Suggested Activity

Write the names and the works of machines given below :
